Detailed Action

This office action is a response to applicant's communication submitted October 9, 2009 wherein claims 21-31 are amended. This application is a national stage application of PCT/JP04/09521, filed June 29, 2004, which claims priority to foreign application JP2003-187931, filed June 30, 2003.

Claims 2-8, 12, 13, 15, 16, and 21-31 are pending in this application.

Claims 2-8, 12, 13, 15, 16, and 21-31 as amended are examined on the merits herein.

Reasons for Allowance

Applicant's amendment, submitted October 9, 2009, with respect to the rejection of instant claims 21-31 under 35 USC 112, first paragraph, for lacking enablement for a method of treating any and all possible viral diseases, has been fully considered and found to be persuasive to remove the rejection as the claims have been amended to limit the diseases being treated to influenza. Therefore the rejection is withdrawn.

Currently claims 2-8, 12, 13, 15, 16, and 21-31 are pending in this application and have been examined on the merits herein. Applicant's amendment submitted October 9, 2009, is seen to be persuasive to remove all rejections of record in the previous office action and place the application in condition for allowance. Reasons for allowance are as follows:

The claimed fatty acyl-asparagine-oligosaccharides are seen to be adequately described and enabled by the specification as originally filed. Asparagine linked fatty acid oligosaccharides having the claimed structure are disclosed on pp. 5-6 of the specification. P. 8 of the specification describes pharmaceutical compositions using these conjugates. Pp. 10-15 of the specification describe how to make the conjugates of the claimed invention. Pp. 15-19 in the specification and figures 4-5 of the drawings disclose that these compounds are sialidase inhibitors. Based on this disclosure, one skilled in the art would be enabled to use these compounds for treating influenza. Therefore the claims meet the requirements of 35 USC 112.

Furthermore the claimed invention is seen to be novel and non-obvious over the prior art. The prior art does not disclose oligosaccharide-asparagine-fatty acid conjugates having the claimed structure. Prior art references such as Ramos, Homans, Davoust, or Wilson (References included with PTO-892) disclose oligosaccharides having the same saccharide units and in some instances an asparagine residue, but do not disclose conjugates in which a fatty acid is attached to the asparagine, or provide any motivation to use these compounds as a drug for treating any condition. Michel et al. (Reference of record in previous action) discloses conjugates containing an oligosaccharide, asparagine, and a fatty acid, but the conjugates also contain on average one additional amino acid, and therefore fall outside of the limits of the claims. Given these prior art compounds, one of ordinary skill in the art would not have been motivated to modify the prior art conjugates to arrive at the claimed invention by

removing any additional non-asparagine amino acids, as there is no indication in the prior art that doing so would result in a compound having improved biological activity.

Regarding claims 8 and 31, which do not require the presence of a fatty acyl group, the compound pictured therein contains no additional amino acids besides asparagine. Although asparagine-linked saccharide structures are pictured in the disclosures of Ramos et al. and Davoust et al., these references only characterize the oligosaccharide portion of the molecules, and not the peptide portion. The disclosed drawings merely indicate a glycopeptide fragment with the group -asn with no indication as to what this asn is linked to or whether it contains additional amino acids. Because the peptide portion is prepared by trypsin digestion of serotransferrin, which is the same method used by Michel et al. above, it is reasonably expected that the peptide portion of these glycopeptides contain the same additional acids besides asparagine disclosed by Michel et al., placing them outside of the scope of claim 8.

For these reasons the claims meet the requirements of 35 USC 102 and 103.

Accordingly, Applicant's amendment submitted October 9, 2009, is sufficient to remove all rejections made in the prior office action as discussed above and to place the application in condition for allowance.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled, "Comments on Statement of Reasons for Allowance."
